| 9. | Aerodrome Facility Directory     | 7 |

#### **FOREWORD**

The Army Aviation Flight Information Bulletin (FIB) is an official source of air operational data covering active Army, Army National Guard and Army Reserve aviation activities. The FIB is published quarterly on the U.S. Army Aeronautical Services Agency (USAASA) web site located at <a href="https://www.usaasa.belvoir.army.mil">www.usaasa.belvoir.army.mil</a>. Reproduction and distribution of the FIB is authorized. This FIB remains in effect until the next edition is published.

Installation/Garrison commanders are responsible for the submission of changes in airfield conditions, facilities, services, air navigational aids and other matters that affect operations at their air facilities by the most expeditious means to:

- (1) Commander, USAASA, ATTN: ATAS-AI, 9325 Gunston Road, Suite N319, Fort Belvoir, VA 22060-5582.
- (2) For units in Europe, Africa and the Middle East contact: Commander, U.S. Army Aeronautical Services Detachment –Europe (USAASD-E), ATTN: ATAS-AD, Unit 29243, APO AE 09102.
- (3) For units in Korea contact: Commander, Eighth U.S. Army, ATTN: EAGC-EA-ATC, Unit 15236, APO AP 96205.

#### **USAASA Contact Information:**

- (1) USAASA Aeronautical Information Division: (703) 806-4872, DSN 656-4872.
- (2) USAASA Airspace Support Division: (703) 806-4866/4865, DSN 656-4866/4865.
- (3) USAASA Message address: RUEANBA/ CDRUSAASA FT BELVOIR VA //ATAS-ZA//.
- (4) FLIP distribution and Army FLIP account manager contact: DSN 656-4870 or (703) 806-4870.
- (5) FLIP changes to aeronautical information contact: DSN 656-4871 or (703) 806-4871.
- (6) Army Air Traffic Control (ATC) and airspace matters contact: DSN 656-4864/4863 or (703) 806-4864/4863.
- (7) For Europe, Africa, and the Middle East contact: DSN 314 373-8079 comm 011-49-6221-17-8079/6426.
- (8) For Eighth U.S. Army (Korea) contact: DSN 315 723-4249 comm 011-82-7913-4249.

Information submitted for inclusion in the next bulletin must be received NLT 30 days preceding the start of the quarter. You must use NOTAMs, FLIP and local data during preflight planning.

### WHO WANTS TO KNOW?

Each edition of the Flight Information Bulletin will contain selected questions <u>received from the field.</u> USAASA welcomes your questions and comments and will provide answers each quarter.

**Question:** How can one calculate climb rate in FPM when given a necessary climb rate in feet per nautical mile?

Answer: (GS / 60) \* feet per NM

Example: 150 knots/60 = 2.5 \* 200' per Nautical Mile= 500 FPM

**Question:** What is the ITCZ?

**Answer:** Intertropical Convergence Zone, an area where thunderstorms develop. The reason for this is northeasterly trade winds to the north of the ITCZ meet southeasterly trade winds from the south. The air is piled up near the surface due to the converging winds forces the warm, humid air over the tropical oceans to rise. As the air rises, it cools and water vapor condenses into clouds and rain. If conditions are favorable, some clusters of thunderstorms that form along the ITCZ can grow into hurricanes.

## **FLIP WORLD**

Map distribution for many deployed units continues to go to the old address. Members of rear detachments should contact the USAASA FLIP Manager to suspend delivery of products for any deployed unit. Units that have changed delivery address to their oversea location may disregard. Word of caution, give us at least a month advance notice prior to re-deployment to ensure delivery commences upon your return.

The Defense Supply Center, Richmond and NIMA have decided to ship all VFR Sectional and Terminal Area products on back order. Many of you are aware that for the last six months, products supplied by the FAA were printed without bar codes attached. By rule, this placed the items in a "non-conformance" status. Many products were not shipped even though they were on normal distribution. While the bar code issue has not been resolved, it has been determined that service to the customer outweighs the need for printing compliance. (At no time was there any problem with the map/FLIP product's depiction of information).

For units alerted for movement please complete the following as soon as possible:

- 1. Contact USAASA with map/FLIP requirements for movement.
- 2. If you are task organized under another command, check with the gaining S2 or S3 to determine if map/FLIP accounts have already been established.
- 3. If you need to establish an account for Europe, Africa, the Middle East or Southwest Asia, contact USAASD-E at <a href="mailto:usaasde@hq.hqusareur.army.mil">usaasde@hq.hqusareur.army.mil</a> as soon as possible. They will assist in the establishment of an account. One consolidated account will be established for each Task Force (TF) in the AOR by the TF CDR/Aviation Officer having responsibility for managing/distributing FLIP.
- 4. If you require your CONUS account to be suspended until your return, contact MSG White at DSN 656-4870, prior to deployment.
- 5. Prior to re-deployment, provide as much advance notice as possible to re-establish your account.

We are here to ensure your FLIP requirements are handled as expeditiously as possible. As a reminder, FLIP cycles are published well in advance. Each cycle, some accounts do not receive all the necessary products. Please email HQ, USAASA or USAASD-E as close to the effective date as possible to allow a trace on your missing products. FLIP retrieval continues to be a problem at some installations. If you have a central map facility, please ensure you contact the facility personnel to remind them you still "exist". This will go a long way in making sure you are notified when your products arrive.

#### NOTAM CORNER

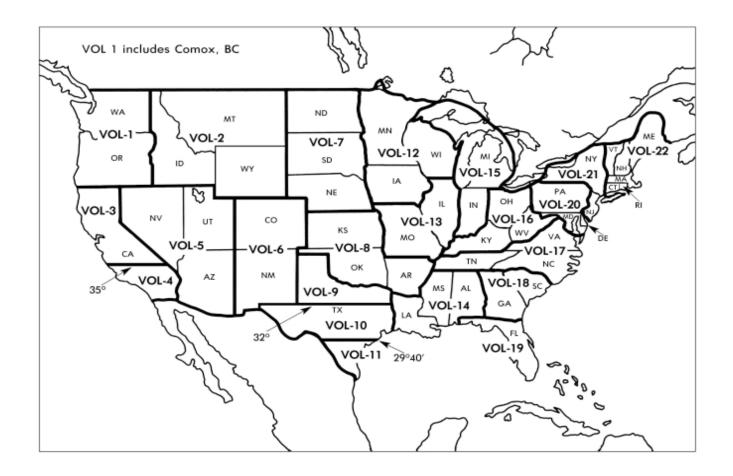

We are in the process of implementing **Aeronautical Information System Replacement** (**AIS-R**) for all locations, it replaces FAA equipment that utilizes dial-up to file flight plans. AIS-R is web based and requires, Netscape 7.0 to operate. We are past the deadline of **30 Apr 03** to transition all military base operations (MBOs) to AIS-R. The 30 Apr 03 deadline is when the dial-up and AIS utilizes Webmail for receiving "roger" and "acknowledgment" messages should have been **terminated**. Please call SFC Boles at DSN 857-4365 if you have not completed this process.

Defense Internet NOTAM System (DINS) has added a **Users Guide** to the website. The new DINS Users Guide is in PDF format, located on the Base Ops Home Page, and is available for downloading or online review. The purpose of this document is to provide a thorough overview of each DINS feature. Note: screen captures may appear slightly blurry. Please forward all comments and suggestions pertaining to this document to the DoD NOTAM Office. Email address: 7-awa-usns@faa.gov, phone DSN 994-4205.

DINS has integrated Selectable NOTAM Printing to the website. A new DINS feature allows users to select NOTAMs they wish to print. To use this feature, just click on the checkbox located at the beginning of each NOTAM when viewing the results of a NOTAM query. When you have reviewed and checked all the NOTAMs of interest, click on the Display Selected NOTAMs button located at the top and near bottom of the query results page. Use the browser's print function to print the desired selection. A date/time caveat is printed at the beginning of the selected NOTAMs indicating that they represent only a portion of the total results for a given query. IMPORTANT: If you wish to print a multi-part NOTAM, each part/section must be selected to ensure the entire NOTAM is printed.

# YOU SHOULD KNOW THAT

• US Terminals Realignment- The 15 Low Altitude United States and three High Altitude United States terminal instrument procedure books are being realigned into one 22 volume High Low Altitude set effective 10 Jul 03. The final three volume High Altitude set dated 12 Jun 03 expired on 10 Jul 03. The 22-volume set will now be published every eight weeks with a High Low Terminal Change notice at the four-week midpoint. In preparation, cross-hatching was added to high altitude and high low altitude procedures. Distribution will be automatically adjusted.

- Digital Aeronautical Flight Information File (DAFIF) Edition 8 Data Edition 8 will be released on DVD, (DVD-5, single layer, one-side, read only, ISSO9660 format, 4.6 GB). The DVD will also contain Edition 7, Map Information DAFIF (MIDAFIF) and ArcView DAFIF (AVDAFIF) (See Appendix V of spec). No separate MIDAFIF/AVDAFIF CD-ROM. Edition 7 will also be on it's own separate CD-ROM. Sample layout version of the Edition 8 DVD will be released in FY03. Specific time for sample layout release is unknown. All comments, questions or concerns may be directed to DAFIF Representative NIMA St. Louis at (314) 263-4646, DSN 693-4646, FAX: (314) 263-4247, or Email: quality@nima.mil
- **UPDATE: ARMY AMPS PROGRAM WILL MERGE WITH PFPS-** PFPS-Army will replace Aviation Mission Planning System (AMPS) 5.x software series and will retain no AMPS legacy software components. Portable Flight Planning Software (PFPS) is also known by its flagship application FalconView.

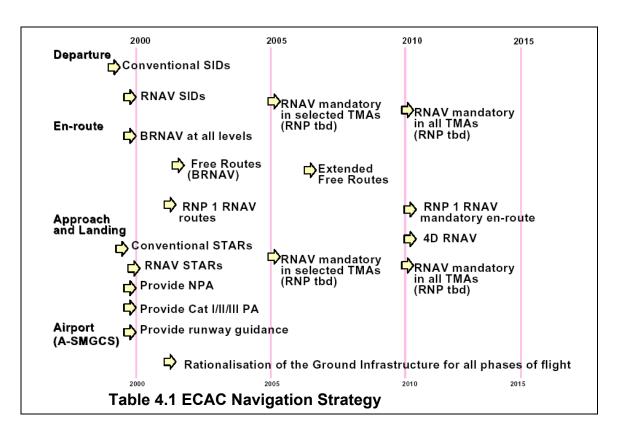

The Army AMPS Program Office is coordinating PFPS with the Air Force, Navy, and U.S. Special Operations Command (USSOCOM) requirements. Army changes are being incorporated into PFPS 3.3. These changes, or "hooks," in PFPS 3.3 enable Army functionality in PFPS-Army 3.3 components to extend the PFPS core functionality. The PFPS-Army version number will always correspond to a core PFPS version.

PFPS-Army can be loaded onto existing desktop and laptop computer systems running the Windows 2000 OS. Initially, only the Miltope hardware will have safety certification for loading aircraft when fielding begins in 3 Jul 03 with the Miltope hardware. PFPS-Army will support the following aircraft: AH-64A, AH-64D Longbow SW 6, 6.1. and 7, CH-47D, OH-58D, UH-60A/L, MH-60A, UH-60Q/HH-60L.

• AIRFIELD SURVEY NOTICE- MACOMs, State Adjutant Generals of the National Guard and installation/garrison or airfield commanders are responsible for ensuring all airfields with Instrument approach procedures are surveyed every five years. These surveys are critical to aviation safety must be kept current and reported accurately, out of date surveys may result in cancellation of instrument approach procedures at Army locations. The U.S. Army Aeronautical Services Agency (USAASA) is the Department of the Army staff agency responsible for collecting, validating, and coordinating Army airfield obstruction and NAVAID data with the FAA and National Imagery and Mapping Agency (NIMA). Reference AR 95-2 and AR 210-20. HQ, USAASA point of contact is Mr. Harrison, DSN 656-4871 or commercial (703) 806-4871.

### **ENAME FOCUS**

More and more preferred routes throughout central Europe are designated with RNAV waypoints rather than ground-based NAVAIDS. The European Civil Aviation Conference (ECAC) has published a road map to phase in RNAV routing while phasing out ground-based NAVAIDS between 2005 and 2010 (see table below).

Aircrews flying IFR in Europe without RNAV equipment onboard may experience problems filing and flying air routes, which are increasingly based on RNAV waypoints. The solution is twofold:

- 1. Ensure that the International Flight Plan (DD Form 1801) is annotated non-RNAV equipped in both block 10 (equipment) and in block 18 (other information). The remark "STS:NON-RNAV" in block 18 will ensure the appropriate air traffic control agency will provide a route that does not rely on RNAV waypoints, or will fix these waypoints with radar.
- 2. Equipment solutions to provide RNAV capabilities are under development for Army aircraft in Europe. CECOM is flight-testing a strap-on RNAV capability for the AH-64 fleet, which incorporates the Garmin GNS-430 system. USAREUR anticipates the fielding of this system during the summer of 2003. Material solutions are also under development for all other non-RNAV equipped aircraft, with projected fielding dates between FY 05-07.

Aircrews with additional questions or comments may contact USAASD-E at DSN 373-8079, or by email at <u>USAASDE@hq.hqusareur.army.mil</u>.
